

KRUSHNA EKNATH KUMBHARE

DATA ANALYST • POWER BI DEVELOPER • MIS EXECUTIVE

Pune, Maharashtra | +91-7719019907 | krushnakumbhare.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and Power BI Developer with 3.7+ years of experience in MIS reporting and business intelligence. I build dashboards people actually use — DAX measures, Power Query transformations, and data models designed around what stakeholders need to see, not just what's available. Along the way I've automated reporting workflows that used to eat hours every week, cleaned up recurring data errors through SQL validation checks, and kept accuracy above 99% on the reports senior management relies on. Comfortable moving between MIS work, dashboard development, and the SQL/ETL layer underneath it — and I keep an eye on where Power BI is heading, including Copilot and Microsoft Fabric.

CORE COMPETENCIES & TECHNICAL SKILLS

BI & Visualization Power BI (DAX, Power Query, M Language, Data Modeling, Star/Snowflake Schema, Calculated Columns & Measures, Row-Level Security, Power BI Service, Power BI Gateway, Dataflows, Incremental Refresh, Paginated Reports, Copilot for Power BI), Excel Dashboards, Data Storytelling, Data Visualization

Database & SQL Microsoft SQL Server 2019, MS Azure SQL Database, T-SQL, ETL/ELT Pipelines (SSIS – Visual Studio), Stored Procedures, Joins, Subqueries, Data Cleansing & Validation, Data Reconciliation, Data Warehousing, Data Warehouse Deployment, Data Governance, Data Profiling & Anomaly Detection

Business & Data Analysis Business Analysis, Data Analysis, Requirements Gathering, Metrics Monitoring, Data Analysis Methodology Design, Critical Thinking, Problem Solving

MIS & Reporting MIS Reporting, Report Automation, Dashboard Automation, KPI Tracking & Scorecards, SLA & Compliance Reporting, Audit Support, Process Automation, Stakeholder Reporting

Programming & Automation Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn), Excel VBA / Macros, Power Automate, JavaScript, Java, PHP

Machine Learning & AI Supervised Learning (Linear & Logistic Regression, Decision Tree, Random Forest, SVM, KNN), Unsupervised Learning (K-Means Clustering, PCA), Predictive Analytics, NLP Basics, Feature Engineering, Model Evaluation (Confusion Matrix, ROC-AUC, Cross-Validation), Data Preprocessing & Hyperparameter Tuning, Generative AI Tools Awareness

Cloud & Data Platforms Microsoft Azure, Microsoft Fabric, Azure Data Factory, Azure Synapse, Azure Data Services, OneDrive, SharePoint

Productivity Tools Microsoft Excel (Advanced Formulas, PivotTables, Power Pivot), Word, PowerPoint, Microsoft Teams

Operating Systems Windows 10/11, Linux

Soft Skills Analytical Thinking, Problem Solving, Attention to Detail, Cross-functional Communication, Stakeholder Management, Time Management, Data-Driven Decision Making

PROFESSIONAL EXPERIENCE

Data Analyst – Executive (Lettering & Reporting) • Credence Resource Management Apr 2024 – May 2026

- Build and maintain Power BI dashboards for executive stakeholders — DAX measures, Power Query transformations, star-schema models — so leadership can track KPIs in real time instead of waiting on manual reports.
- Cover letters used to take hours to generate, protect, and send out one by one. I automated the whole thing with Excel VBA macros, cutting that effort by roughly 60%.
- Own the weekly and monthly MIS reporting cycle for senior management, keeping master datasets clean and data accuracy above 99%.
- Write T-SQL queries to pull, validate, and reconcile data from SQL Server for audit and compliance reporting — including catching mismatches before they reach a report.
- Sit with cross-functional teams to figure out what they actually need from a dashboard, then build it in Power BI rather than guessing at requirements.
- Set up SQL and Excel-based validation checks that brought reporting errors down by 25%.
- Review incoming customer and operational data as it's collected, profiling it for anomalies before it ever reaches the data warehouse.
- Work with IT on software and infrastructure upgrades that support the reporting stack, and keep an eye on KPI metrics day to day, adjusting the analysis approach when something looks off.

MIS Analyst – MIS Reporting • *SoftGrid Info Pvt. Ltd.* Sep 2022 – Apr 2024

- Worked directly in large Excel datasets to pull out the insights that fed into MIS reporting and business planning decisions.
- Built Power BI dashboards with drill-through pages, slicers, and custom DAX measures so business trends were easy to spot at a glance.
- Wrote SQL scripts to extract and transform data from multiple relational databases for warehousing and reporting.
- Took recurring MIS reports that were built manually with PivotTables and VLOOKUP and automated them, shortening the reporting cycle.

KEY PROJECTS

Tourism Analytics Dashboard – Thailand | Power BI

- Built a Power BI dashboard on Thailand's 2022-2023 tourism data — visitor segmentation, trend monitoring, tourist behaviour patterns, and compliance insights.
- Used DAX measures and Power Query transformations to keep the data model clean and the report fast.
- GitHub: [Link](#)

VTONE Fitness Gym – Member Analytics Dashboard | Power BI + SQL

- Analyzed gym member demographics, activity levels, fitness goals, and membership types using a star-schema model in Power BI.
- Wrote the SQL behind the extraction and transformation, then built DAX measures for age distribution and retention analysis.
- GitHub: [Link](#)

KEY ACHIEVEMENTS & AWARDS

- Recognized as Best Employee of the Quarter at Credence Resource Management for work on reporting, automation, and business insights.
- Brought reporting errors down 25% by building SQL-based validation checks that catch mismatches before reports go out.
- Built the VBA automation that now saves the team roughly 60% of the time previously spent on manual reporting.
- During Data Science training at Datamites, applied Random Forest and Logistic Regression models in Python/scikit-learn for classification tasks, including the full pipeline — preprocessing, feature engineering, cross-validation, and hyperparameter tuning.

EDUCATION

Bachelor of Computer Applications (BCA) 2022

MGM College of CS and IT, Nanded — 77.11%

CERTIFICATIONS

- Data Science & Machine Learning Course — Datamites, Pune
- Full Stack Web Development Training & Internship (7 Months) — DevTown, Remote
- Advanced Java Certification — MGM College of CS and IT, Nanded
- Microsoft Power BI — Self-Directed Learning & Project-Based Certification (DAX, Power Query, Data Modeling, Microsoft Fabric)
